## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 12-19 are drawn to a method for treating epilepsy in a dog comprising administration of 1-(4-chlorophenyl)-4-(4-morpholinyl)-2,5-dihydro-1H imidazol-1-2-one, classified in class 514, subclass 229.8 and 393.
- II. Claims 20-21 are drawn to a method for treating behavioral abnormality in a dog comprising administration of 1-(4-chlorophenyl)-4-(4-morpholinyl)-2,5-dihydro-1H imidazol-1-2-one, classified in class 514, subclass 229.8 and 393.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are drawn to the treatment of epilepsy by administration of 1-(4-chlorophenyl)-4-(4-morpholinyl)-2,5-dihydro-1H imidazol-1-2-one (Group I) and the treatment of behavioral abnormalities, namely anxiety, by administration of 1-(4-chlorophenyl)-4-(4-morpholinyl)-2,5-dihydro-1H imidazol-1-2-one. The inventions are distinct in that epilepsy is characterized by involuntary changes in body movement or function, sensation, awareness, or behavior while anxiety is characterized by a complex

combination of emotions ahtat includes fear, apprehension and worry, and is often accompanied by phycial sensations such as palpitations, nausea, chest pain and/or shortness of breath. Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is proper. Moreover, the searches in non-patent literature databases would be extensive and will not overlap thus presenting a search burden to be searched together. Thus, Inventions I and II have been appropriately restricted on the basis of being both independent or distinct and presenting a search burden on the Examiner if they were to be searched together.

### ***Conclusion to Restriction Requirement***

Applicant is advised that the reply to this requirement to be complete must include (i) an election of an invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A telephone call was made to Norman Hanson on 11/1/06 to request an oral election to the above restriction requirement, but did not result in an election being made.
